CargoMaster

Self Contained Goods Lift

A high quality, UK built goods lift supplied with galvanised metal shaft

About the CargoMaster

The CargoMaster range of goods lifts brings a British manufactured range of tough, high quality units to the market. These lifts are designed to be installed without the costly building of a conventional structural lift shaft as each unit is supplied complete with it's own galvanised metal clad shaft and purpose built pump/motor room.

The CargoMaster is available in a range of lifting capacities including 750kg, 1000kg, 1500kg and 2000kg.

These lifts are manufactured to the requirements of the new Machinery Directive 2006/42/EC, enabling the lifts to be installed without the need for a deep pit or an excessive headroom requirement.

Specifications:

- Up to 6m travel
- 2 or 3 levels
- Direct acting hydraulic drive
- Galvanised Bolton shutter gates on landings
- Mid bar gate on lift car
- Galvanised panels on lift car and structure
- Fabricated sills for heavy usage
- 100mm pit
- Fabricated pump room provided

Options:

- Through car
- Shutter gates on car to enable passenger use
- Assisted disabled use
- Aluminium chequer plate ramp in lieu of lift pit
- Bumper rails in lift car
